

Plant OEE software that supervisors actually use every shift

Capture production, downtime, changeover and wastage on the shop floor — then see live OEE, line-wise performance and plan vs actual without SAP complexity.

- AVAILABILITY
- PERFORMANCE
- QUALITY
- MES-READY

THE PROBLEM

Most plants know production happened. Few know **where OEE was lost** — by hour, line, SKU, or shift. Excel sheets arrive late; ERP does not live on the floor.

WHAT YOU GET

Shop floor Work orders, hourly production entries, downtime, changeover, wastage & approvals.	OEE dashboards Plant, line-wise, day-wise & week-wise OEE with A × P × Q breakdown.	Loss analytics Downtime Pareto, changeover analysis, manpower, wastage reports, plan vs actual.
Sales view Cases, revenue, brand & channel performance — same date filters as the plant.	Master data Plants, lines, machines, shifts, brands, products & SKUs, production targets.	Built for roles Supervisor enters · Manager approves · Owner sees KPIs — with audit trail.

BEST FIT

- Beverage, dairy, food, packaging & similar shift plants
- 1–5 lines to start (expand plant-wide later)
- Today on Excel / paper shift reports
- Need clarity on downtime, changeover & scrap
- Want results in weeks — not a 9-month MES project

Indicative India pricing

Starter (up to 2 lines)	₹25–45k / mo
Plant (full modules)	₹60k–1.2L / mo
Sales dashboard add-on	+ ₹15–30k / mo
Implementation & training	₹75k–2.5L

Annual prepaid preferred. 30-day paid pilot on one line available. Final quote by plant size & scope.

HOW WE START

Week 1: master data + one line live · **Week 2–4:** daily shift entry habit · **Day 30:** review OEE & losses — convert to annual if the floor is using it.

BOOK A 12-MINUTE PLANT DEMO

Bring one week of shift numbers — we show your OEE story on screen the same day.
